## WORK EXPERIENCE

---

### DOST–Philippine Textile Research Institute

June 2025–August 2025

*Web Development Intern*

*Taguig City, Philippines*

- Built a multi-line purchase request experience with automatic cost calculations and rich-text request details using CKEditor 5, improving the consistency and clarity of the encoded PR data.
- Implemented unique tracking codes + QR code generation per document and a scan-to-view tracking flow using Simple QrCode, enabling faster document lookup and routing.
- Strengthened traceability by adding an audit trail for 6+ document lifecycle actions and enabling recipient-based private sharing with database notifications in Laravel.

## PROJECTS

---

### Pathfinder

- Built an interactive tourism guide for Catanduanes that supports destination discovery, itinerary planning, route visualization, travel assistance, and shareable trip summaries for a more guided visitor experience.
- Developed a kiosk-friendly travel planning experience that helps users explore local attractions, organize multi-day trips, preview routes, and access relevant destination information in a clear and accessible format.

### MotoScope

- Built an interactive motorcycle showroom prototype that allows users to explore motorcycle models through visual model viewing, variant details, color previews, and structured specification panels.
- Developed early customization and rider-fit visualization flows to support a more interactive motorcycle browsing experience beyond static photos, basic specs, and traditional product listings.

### EatWell

- Built a mobile-first meal planning app concept that helps Filipino students create affordable, balanced meals from pantry items, budget limits, and Pinggang Pinoy-inspired plate guidance, with features for meal suggestions, pantry-aware planning, and simple grocery gaps.

## EDUCATION

---

### Catanduanes State University

2022 - 2026

*Bachelor of Science in Computer Engineering*

*Virac, Catanduanes*

## SKILLS

---

### Technical Skills

- **Languages:** PHP, JavaScript, TypeScript, Python, SQL
- **Backend:** Laravel, REST APIs, Authentication, Eloquent ORM, Queues/Redis, FastAPI
- **Frontend:** React, Next.js, Svelte, Vite
- **Tools & DevOps:** MySQL/PostgreSQL, PHPUnit/Pest, Postman, Git/GitHub, GitHub Actions, Docker
